

DriPAD™

Super Absorbent Pad

Manage the risk of biohazards and keep fluids contained

Super absorbent technology that soaks in up to 35x its weight in fluids. Up to 10x more absorption power than alternative pads

Keeps odors contained once fluids have been trapped and solidified deep inside the pad's core

DriPAD™

Super Absorbent Pad

Super absorbent technology that helps you manage the risk of biohazards

DriPADs do much more than absorb. They control and isolate the spill, and then trap the fluids inside.

SUPER ABSORBENT TECHNOLOGY

DriPADs absorb up to 35x their weight in fluids,* making them more efficient than the leading absorbent pad on the market. That's up to 10x more absorption power than alternative pads.*

A specially treated absorbent core draws fluid away from the surface and traps it in the interior, so that the surface remains dry.

CONTAINMENT & ODOR CONTROL

Each DriPAD features a robust polypropylene backing to provide a barrier that prevents leakage.

An EPA registered Silver Ion agent helps control odors once fluids have been solidified deep inside the absorbable core.

COST EFFECTIVE / ENVIRONMENTALLY FRIENDLY

DriPADs are more efficient and much more cost effective than any other pad on the market.*

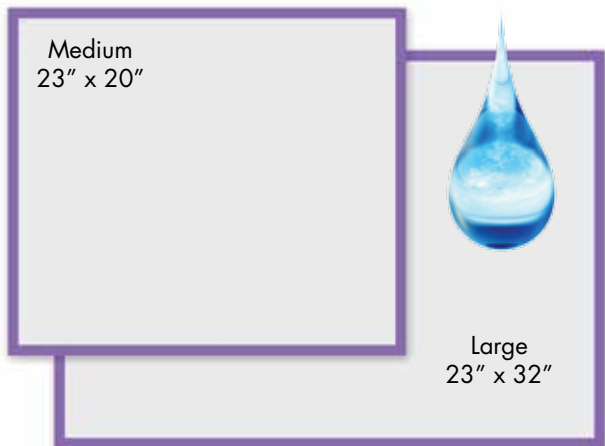

Just one DriPAD replaces many Chux® pads, and reduces the amount of unnecessary waste in landfills.*

DriPADs solidify blood and biofluids, making them more manageable for waste disposal.

*Data on file.
