EndoMAXX™

Fully Covered Esophageal Stent

EXPANDING THE POSSIBILITIES™

MERRITMEDICAL
ENDOTEK®

ENDOMAXX™ FULLY COVERED

The EndoMAXX Fully Covered

Esophageal Stent begins a new era in esophageal stenting. Based upon years of clinical experience and feedback, the EndoMAXX incorporates advanced features designed to alleviate common adverse events associated with esophageal stenting.

GOLD SUTURE MARKER

Increases endoscopic and fluoroscopic visibility of the metal suture

The new proprietary design of the EndoMAXX allows for variations in radial force along the stent body that are designed to reduce tissue irritation and damage to healthy esophageal mucosa.

The unique design helps facilitate soft and atraumatic interaction with healthy tissue while maintaining luminal patency and stent integrity.

ESOPHAGEAL STENT

DISTAL METAL SUTURE

Provides a means for distal repositioning of the stent immediately post stent placement

THE LASER CUT STENT DESIGN PROVIDES FOR VIRTUALLY NO FORESHORTENING NOR ELONGATION OF THE STENT RESULTING IN:

- Increased deployment accuracy with no need to compensate for stent foreshortening
- Reduction in stent movement “inch worming” as a result of the stent elongating and shortening from changes in compression force

REDESIGNED ANTI-MIGRATION STRUTS

Provide increased mucosal wall contact and friction, while remaining fully covered.

SILICONE COVERING

Designed to inhibit tissue ingrowth.

PROXIMAL METAL SUTURE

Provides increased resistance to gastric fluid and increases suture integrity for immediate stent repositioning or removal.

EndoMAXX™ delivery system

KEY FEATURES

- Coupled with the non-foreshortening stent design, the ergonomic deployment handle and trigger provide unmatched ease of use and accuracy in stent deployment
- Designed for one-handed deployment
- Incorporates a pliable and tapered tip to facilitate placement through tight strictures
- Featuring a low profile, flexible and preloaded design

EndoMAXX™ Fully Covered Esophageal Stent

Catalog Number	Stent Size Options			Delivery Device		Packaged
	Nominal Stent Body Diameter (mm)	Expanded Stent Length (mm)	Nominal Stent Flare Diameter (mm)	Working Diameter (F)	Working Length (cm)	
MAXX-197	19	70	24	24	90	1 unit
